DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4 and 6-15, drawn to a system for managing one or more procedure in a blood collection facility performed upon a blood donor and facilitated by an operator remotely, classified in class 604, subclass 6.11.
 - II. Claims 16-23, drawn to a system for managing one or more procedure in a blood collection facility including a wireless operator interface means for transmitting and receiving wireless communication, classified in class 604, subclass 6.15.
 - III. Claims 24-30 drawn to a method and medium readable by computer for managing one or more procedure and operating interface in a blood collection facility including a blood collection instrument and a blood collection kit, classified in class 604, subclass 6.11.

NOTE: There is a missing claim 5 and the Examiner has grouped the claims without including claim 5.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a system for managing one or more procedure in a blood collection facility performed upon a blood donor and facilitated by an operator remotely. Invention II has separate utility such as a system for managing one or more procedure in a blood collection facility including a wireless operator

interface means for transmitting and receiving wireless communication. Invention III has separate utility such as a method and medium readable by computer for managing one or more procedure and operating interface in a blood collection facility including a blood collection instrument and a blood collection kit. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for each group is not required for other groups, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
